OBJECTIVE

When I see creativeness in UI designs, I always wonder, how can I make it alive. I believe in learning by doing. I am happy to play with different technology stacks based on business requirements and also wants to use my existing knowledge, in scaling and enhancing products. As a UI developer I always make sure to develop a reusable, accessible and long lasting feature. At last our final product will depend on the amazing team and the culture we share. I am looking for such team and culture.

EDUCATION

❖ B.tech, 2015 - 19

- ❖ Computer Science and Engineering
National Institute of Technology, Uttarakhand
7.53

❖ Software Trainee , May-2017

MEAN Stack
DUCAT Noida

CERTIFICATIONS

❖ MEAN stack

❖ LinkedIn learning

- ❖ CSS Essential training
- ❖ CSS: Design Systems and Architectures
- ❖ Learning Functional Programming with JavaScript
